

Commercial – Industrial – Municipal Pump Systems
Sales, Service, Parts & Expertise

Commercial & Industrial Pump Division

Since 1978...

we have been working with pump systems and know what you need to keep your systems running reliably and effectively. We know pump problems happen in all operations. That is why PumpMan Pittsburgh pump specialists are here to service you.

Try US ... Whether you're facing a water emergency or designing the water system for new construction we provide quick response and expert advice. We are experienced problem solvers committed to your 100% satisfaction guarantee behind every rebuild and repair. While pumps are the central element of the pump system, we also service motors, controls and other integral equipment. Other essential parts may be valves of which we are the exclusive representative for CLA-VAL (Complete valves, parts, kits and accessories) in Western Pennsylvania and West Virginia.

We understand the ever-changing requirements of your facility and unique needs. We are here to help you by providing services and support for maximum operational efficiency and cost effectiveness.

PumpMan Pittsburgh, your full-service pump supplier offers sales, service and parts through our service center conveniently located in Pittsburgh and branch sales office in West Virginia. Supported by our pump specialists who are available 24 / 7 for field trouble shooting and repairs.
